

Source workbooks
D1–D5, not redistributed
+ SHA-256 manifest

Configuration
variable roles, QID
scenarios, thresholds

ASP rule base
privacy_rules.lp
39 rules

Profiler
verify hashes, normalize,
drop all-empty rows,
build equivalence classes,
compute U_Q , $G_{k,Q}$, H_Q

dataset profiles (CSV/JSON),
column inventory

facts

Policy Engine
basis-point ASP facts,
Clingo grounding and solving,
integrity constraints,
exactly one stable model

decision, flags, actions
with rule trace

decisions

Report Generator
merge profiles with
decisions, render audit
report and manuscript
artifacts

audit report, result tables,
 $\LaTeX$ macros

HALT: fail-closed
hash mismatch, missing QID,
malformed facts, UNSAT

Documented human review
decision support, not a
release authorization
