

Source workbooks
D1–D5, not redistributed
+ SHA-256 manifest

Configuration
variable roles, QID
scenarios, thresholds

ASP rule base
privacy_rules.lp
39 rules

Profiler
verify hashes, normalize,
drop all-empty rows,
build equivalence classes,
compute U_Q , $G_{k,Q}$, H_Q

facts

Policy Engine
basis-point ASP facts,
Clingo grounding and solving,
integrity constraints,
exactly one stable model

decisions

Report Generator
merge profiles with
decisions, render the
narrative audit report

dataset profiles (CSV/JSON),
column inventory, scenarios,
 $\LaTeX$ macros

decision, flags, actions
with rule trace

Markdown audit report

HALT: fail-closed
hash mismatch, missing QID,
malformed facts, UNSAT

Documented human review
decision support, not a
release authorization
